Poem review

Title: Firework Night

Poet: Enid Blyton

This poem is about fireworks at night.

My favourite line in the poem is And guard you safely all the night because you understood my fright.

Because it's a lovely ending and makes me feel happy for the dog.

Feelings and emotions: fear and fright, the dog feels lost and unloved for a moment, then relief and gratitude when the family lets him into the house.

Images: I see and hear the fireworks light up the night sky and boom with a thunderous noise. I see the poor dog tremble, yelp and cower outside the back door. I see the door open and feel the happiness of the dog as he jumps and licks the hand of the Mistress. I then see the dog hide behind the couch. Then out to the kennel for the rest of the night when the fireworks are over to stand guard over the family. You think they would have let the dog stay in the house for the rest of the night!

Adjectives: little, big, flat, warn, grand,

Verbs: shooting, hear, want, let, begin, shoot, bear, love, think, die, opened, rushing, let, slip, hide, run, guard, understood

Sound patterns: bang-band; most pairs of lines rhyme, yelp-help;in-begin.....; Mistress, Master; let me lick..

What I like? I love the story the poem tells. The dog is afraid of the fireworks and lonely outside the house. but in the end there's a happy ending and he's let into the house. He shows his gratitude at the end by promising to guard the family. This poem was written a long time ago and it's interesting to know that dogs were just as scared of fireworks then as they are today.

What I dislike? I don't like the question in the poem, shall we let him in? Don't even ask the question. Just let him in already!

3. What 2d Shapes make up the faces of these 3d solids?
 - a) Cube=Squares
 - b) Cuboid=Rectangles
 - c) Cylinder = 2 Circles and 1 rectangles
4. The Odd one out is a Circle because it is the only 2d shape.

Tuesday -Maths

1.
 - a) A Cone has 1 flat face and 1 curved Face.
 - b) A Cylinder has 2 flat faces and 1 curved face.
 - c) A cube has 6 flat square faces.
 - d) A sphere and Cylinder have no vertices.
 - e) a Cylinder has 2 curved edges.
 - f) A Sphere has only one face,
 - g) A cube and cuboid each have 12 edges.
 - h) a cone only has 1 vertex.
2. A sphere, cone and cylinder can roll.
A cube and cuboid can slide.

The Cylinder and cone can both roll and slide.

Pyramid, Triangular prism.

1a) This is pyramid. It has:

5 flat faces.

8 straight edges.

5 vertices.

b) If I trace around the faces, I will draw 1 square and 4 triangles.

2. a) This is a triangular prism. It has:

5 flat faces.

9 straight edges

6 vertices

b) If I trace around the faces, I will draw 2 triangles and 3 rectangles.

3. a) Sphere

- b) Cone
- c) Triangular prism
- d) cylinder
- e) cube
- f) pyramid
- g) cube
- h) triangular prism

Challenge: It takes 9 cubes to make the shape!
