All About Giraffes **Answers**

Giraffes are the **tallest** living animal in the world. They can **grow** up to about 5 metres tall. That is about as tall as a doubledecker **bus**!

Giraffes live in the grasslands of **Africa**. When they were first discovered, people thought they were a cross between a leopard and a **camel**.

Their long **necks** mean they can reach the **leaves** in the tallest part of the trees, where the other **animals** cannot reach. They like the leaves on the **acacia** tree most. They spend most of the **day** eating.

Giraffes can run at speeds of 35mph but only for a **short** time. They can sleep **standing** up but usually sleep sitting down with their **feet** tucked under them.

Amazing Fact
In the wild, giraffes eat up to **34kg** of leaves and plants every day and spend 16-20 hours a day eating!

Bonus
Metre is the British English spelling while *meter* is the American English spelling but they both mean the same thing.

<u>Counting:</u>
1. No she couldn't be counting in 10s because she started at 50, the unit is 0 and she reached 95 and the unit is 5 therefore she could've been skip counting in 5s.
2. Coling could've been counting in 2s if he went from 74 to 86 because the units 4 and 8 are both factors of 2.
3. Oscar would have reached 50 by counting in 5s from 30 because 5 divides into 50 evenly but also counting from 30 evenly it would bring you up to 50.
